

*Southern Cross Stainless Steel*

## DEBRISTROUGHS & ASH TRAYS

Debris troughs are made in any length in satin finish stainless steel to suit individual requirement or existing bar facilities. These units can be made with radius or splay corners. They incorporate a debris receptacle & foot rest. One end may be left open for easy cleaning. Where conditions do not permit open ends, a removable section 300mm long may be installed if required.

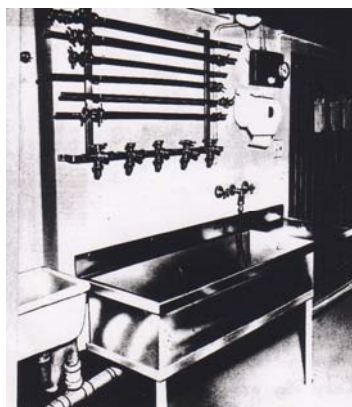

Ashtrays may be fabricated to specification using attractive satin finished stainless steel for use in a variety of locations. They are supplied as floor units, removable wall-hung units for easy cleaning, and permanently fixed vandal-proof units which may be tilted for cleaning.

### Extractor Trough

Designed especially for washing beer stems or extractor pipes these troughs have a deep, larger than normal bowl and a high splash back. There are four models available

### Stem & / Fitting Rack

Stainless Steel racks for storing stems and other fittings.
