# HAEMODIALYSIS RENAL STATION

MODEL NO: SPSH  
PRODUCT CODE: HR500

925mm high x 340mm wide x 1.2mm grade 316 satin finish stainless steel. This station is fabricated to meet board of health regulations and is fully fitted with two filters, 1 unit to supply tempered water only, the other to supply the cold outlet and the cold supply to the thermostatic mixing valve. Each station is also fitted with two key operated stop cocks, strainers, one thermostatic mixing valve (approved for use in health care applications). 1—15mm demineralized water supply stop cock and spout is fitted to each unit. At the base of the station the specially fabricated bowl is complete with a 100mm diameter waste outlet with grate and removable perforated stainless steel needle arrestor. The five stainless steel tube guides are located 100mm above the top of the bowl. All pipe work is connected within the rear of the station, ready for instant connection to services. Fully fabricated and supplied by Southern Cross Stainless Steel.
